About KCES's IMR

Khandesh College Education Society, Jalgaon, established in 1944 is a profound academic movement with various institutes under its umbrella. Institute of Management & Research, Jalgaon was established in the year 1986 and is a pioneer institute in the field of management education in North Maharashtra Region, and continues to be an Institute of repute in its 35th year!

The Institute stands tall in North Maharashtra with dedicated and committed faculty, good infrastructure, learning resources and progressive teaching pedagogy with consistent placement record and a vibrant campus life.

Located in the heart of the city, IMR has an enviable infrastructure, a spacious lobby and computer labs, latest teaching aids and learning resources. The Institute has well stacked libraries with numerous National & International Journals along with adequate e-journals and a number of titles.

Our institute has tie-ups with prestigious organizations both academic and from industry which is a part of our continuing efforts to improve the quality of education and exposure to students and society.

The Institute is well known for activities which are not only student friendly but also focus on the upliftment of society in general and stakeholders in particular. The institute was recently awarded 'Outstanding Management college in India for Industry interface 2019' recognized for outstanding contribution to Education, Skill and Research at the hands of President C E G R and Member secretary AICTE New Delhi.

About the Program

Interconnectivity, automation, machine learning, and real-time data are all part of Industry 4.0, a new phase in the Industrial Revolution. Industry 4.0, known as **Industrial Internet of Things (IIoT)** or smart manufacturing, combines physical manufacturing and operations with smart digital technologies, machine learning, and big data to create a

more holistic and linked environment for manufacturing and supply chain management firms. While each company and organisation is unique, they all confront the same challenge: the need for connectivity and real-time information across processes, partners, products, and people.

This program is intended for both Management and Computer faculty members who are looking to be abreast with the current situation, and move on in the hierarchy. This program will be useful for faculty who are teaching students to be competitive in the industry, with lot of tech-savvy players, help them identify and address issues before they become bigger problems, and for ways to digitize to make sense of information.

Objectives of the program

1. To provide an insight into the challenges faced by academicians to cope with industry 4.0 compliance
2. To identify relevance of NEP in tune with Industry 4.0
3. To identify the resources and ways to deal with and manage this technology

Vision & Mission

Vision:

"Committed to provide value based, quality, professional and technical education to the students and empowering them with the required skillsets and competencies to face challenges of the fast changing global environment."

Mission:

- To provide necessary technical and professional education with a view to uplifting the lives of rural and urban students.
- To create a conducive platform for students to develop their skills and knowledge.
- To encourage innovation and research aptitude among students.
- To inculcate global ethics and human values in all the learners.
